> Invacare[®] Reliant 350 Stand Assist

A Heavy Duty Stand Assist

The small and maneuverable *Invacare[®] Reliant 350 Stand Assist* can provide easy, safe and comfortable assisted transfers for patients in care or with rehabilitation needs. With a maximum user weight of 158 kg its design allows patients to be transferred or assisted from either a bed or chair.

Adaptable and Easy to Use

This product can be used for 2 types of transfer; standing assistance or seating assistance. It features a multi-adjustable lift boom with an ergonomic lift angle designed to minimise shear when lifting a patient. Simple lever adjustment helps to manoeuvre the stand assist into small or confined spaces, and the base legs can be adjusted for added stability. In addition, the stand assist has a non slip footplate, a height adjustable padded knee guard and battery recharge indicator (visual and audible). It can complete 40 lifts on 1 battery charge and includes a spare battery and charger.

Safe and Reliable

The **Stand Assist** features 3 different height settings and easy to use hooks for sling attachment plus a safety mechanism to prevent the sling from disengaging. Added safety features include an emergency stop button, an emergency mechanical descent system and an anti-entrapment device, (which stops the boom lowering if it meets resistance). For ease of transport and storage, the **Stand Assist** can be dismantled.

Options

Stand Assist Sling

Offers a comfortable and safe transfer for users who have some weight bearing ability, but who cannot stand independently. Well padded with non-slip material on the back. Available in 4 sizes: S, M, L & XL.

Transfer Stand Assist Sling

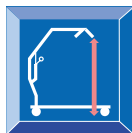

Enables a simple seated transfer. Used for those with good body and head control who are able to grip the lift boom. Available in 4 sizes: S, M, L & XL.

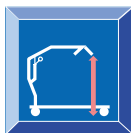

Independent charger

Each lifter is delivered with 2 batteries and an independent charger. Removable battery eliminates down time.
